

2.5 Investigation Tool

	Paper Clip (g)	Straw (g)	Cup of BTB (g)	Pencil (g)
Group				
Class Average				
Max				
Min				

Make a bar graph that includes your groups data, the class averages and minimum and maximum lines for the class data.

Answer the following questions in your BILL:

Compare your groups results to the class average results. Are they similar for all groups of objects? Why are they not?

What does your breath do to BTB solution?

What change do you see? What substance in your breath might be causing this change?
