AP Biology 050 – Populations Video Review Sheet

www.bozemanscience.com/050-populations

- 1. Define symbiosis:
- 2. Explain the relationship(s) between the clown fish and the sea anemone/algae?
- The Symbiosis can _____ or ____ an ecosystem.
 Ecosystems are kept in check by:
- 5. If they are not in check a c_____ can happen.
- 6. Fill in the matrix of Interactions:

Effect on X	Effect on Y	Type of Interaction	Example explained(name the organisms and their interactions)
			2 examples here:

- 7. How are the wolves and elk an example of a negative feedback loop?
- 8. Kudzu, once introduced into a new ecosystem, is unstoppable until now...what has happened?
