

Name: _____ Period: _____ Date: _____

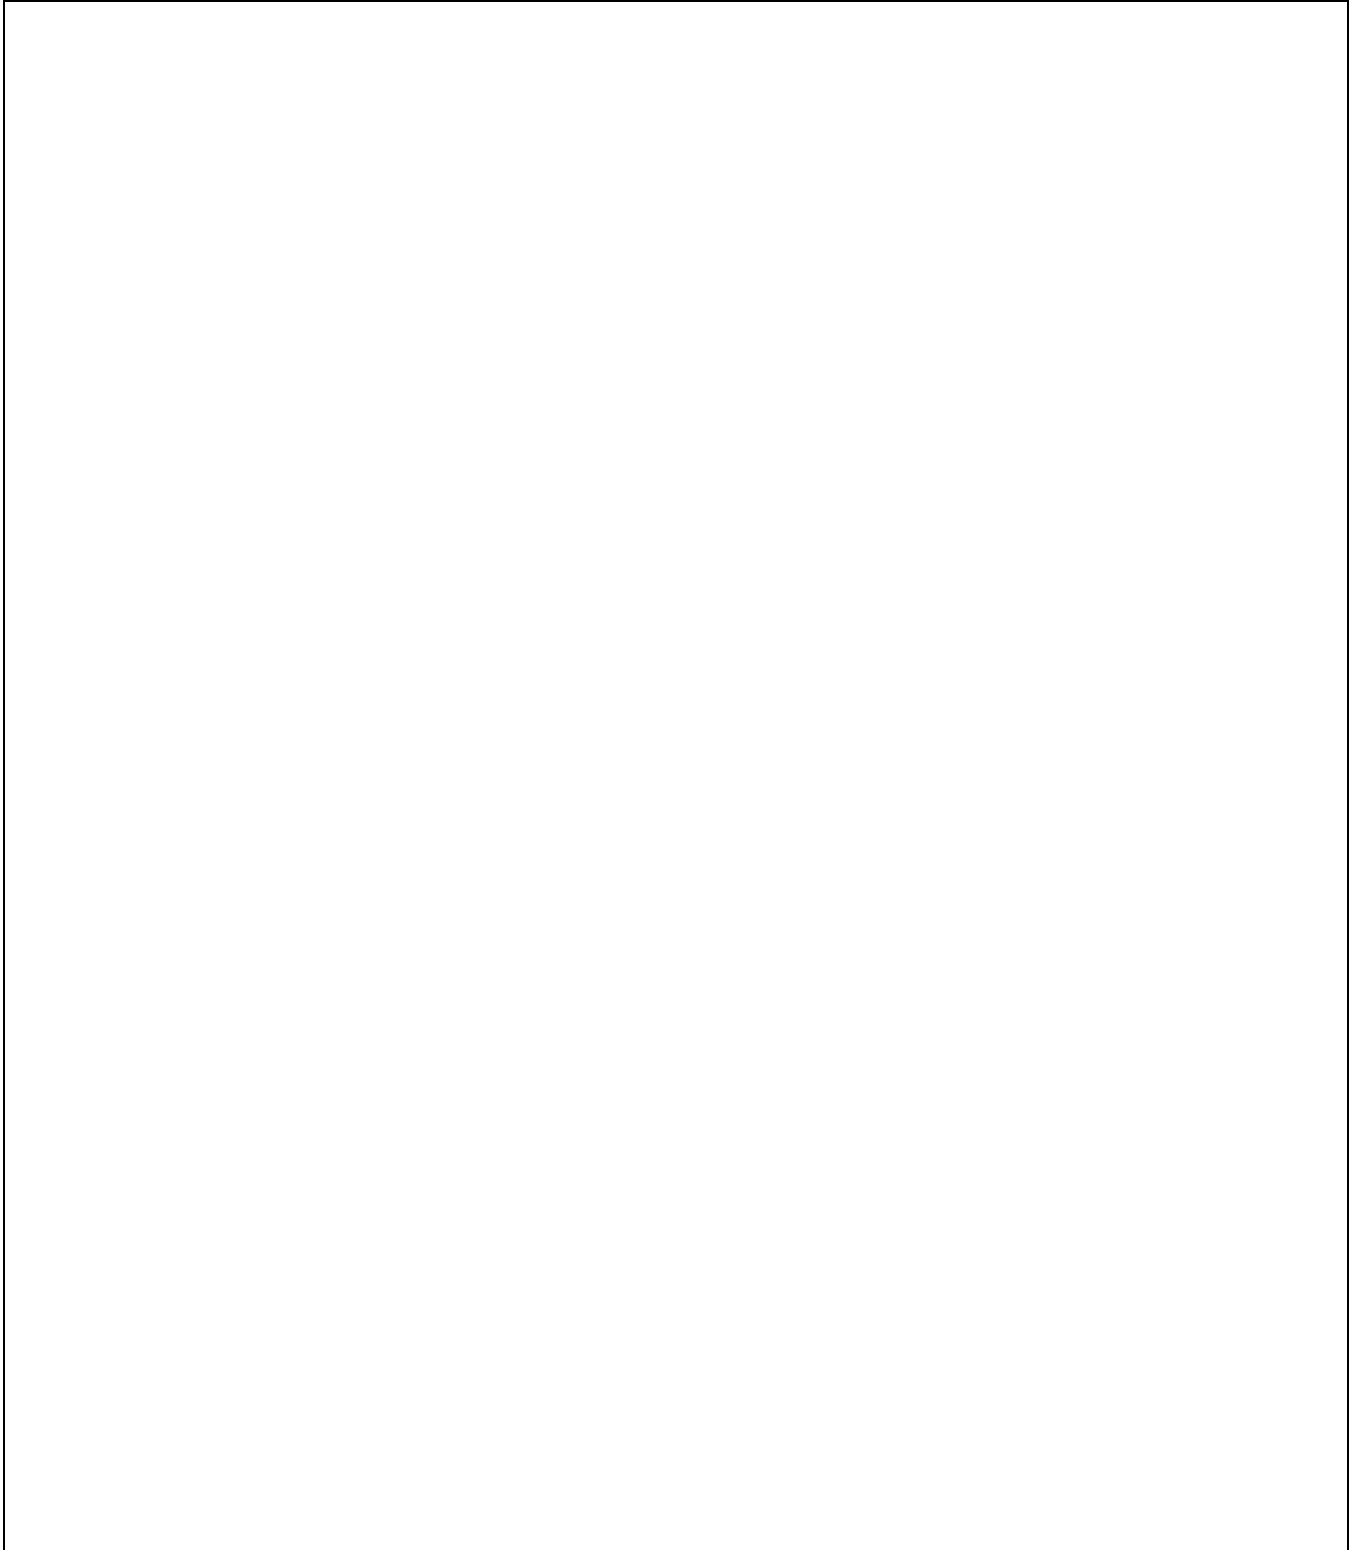

Lesson 1: How Did This Little Girl Get So Sick?

Procedure:

1. You will watch a video clip (13 min long) that will introduce you to the case of a little girl who also got sick and went to the doctor to get medicine to help her get better.
2. Keep a record below of any important events that occurred in this little girl's case that might help us understand what happened to her and why it happened. Keep track of any questions that you have as well.

Important Events	Questions

Draw a Model: In the space below, draw a model that explains how Addie got sick, then a little better, then sick again, then a little better, and then eventually ended up getting VERY sick.

Compare our Models: Share out your models with the members of your small group. Have one member record the similarities and differences across all of your models.

Similarities	Differences

Conclusions: What conclusions did your class draw about the Addie's case? Summarize your conclusions in the space below.

Next Steps: What ideas did your class come up with for what we should investigate next to help answer some of the questions that we raised in this lesson?
