

1. **Data Analysis** Draw a line graph of the number of tracks per 100 km through time for foxes and cats.

9. **Data Analysis** Use the data in Table 2 to create a line graph showing the changes in populations of bilbies, malleefowl, and banded hare-wallabies through time. Put an arrow on your graph at Sampling Period 7. This is the time period when 30 individuals of each species (15 males, 15 females) were introduced to the peninsula.
